Education

Thapar Institute of Engineering and Technology <i>B.E. in Electronics and Computer Engineering — CGPA: 9.1</i>	2023 – 2027 <i>Patiala, Punjab</i>
Delhi Public School Bulandshahr <i>CBSE Class XII — Percentage: 93%</i>	2022 <i>Uttar Pradesh</i>
Delhi Public School <i>CBSE Class X — Percentage: 96%</i>	2020 <i>India</i>

Technical Skills

Programming Languages: Python, C, C++
Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js
AI / Machine Learning: Deep Learning, NLP, Hugging Face, Transformer Models, PyTorch, Semantic Search, LLM Applications
Databases: MongoDB, SQL
Tools & Technologies: Git, GitHub, Linux, Google Colab, VS Code, Postman, REST APIs
Other Skills: Data Structures & Algorithms, Problem Solving, PDF Processing, Document Retrieval Systems

Projects

- Dialect-Sensitive Punjabi Translation Framework (Ongoing)**
- Developing an NLP-based translation framework for handling dialect variations in Punjabi, focusing on Malwai and Doabi dialects.
 - Working on audio collection, preprocessing, transcription, and dialect-aware translation modeling.
 - Using transformer-based deep learning approaches for improving contextual translation accuracy.
 - Tech Stack: Python, NLP, Hugging Face, PyTorch
- LLM-Based Query Retrieval System**
- Developed an intelligent document query-retrieval system capable of semantic search across PDFs and documents using LLMs.
 - Implemented embedding-based retrieval and explainable response generation for user queries.
 - Tech Stack: Python, Semantic Search, NLP, Vector Databases
- Document Signature Application**
- Developed a full-stack document signature platform enabling PDF upload, signature placement, and signed document download.
 - Implemented drag-and-drop signature placement and PDF manipulation features.
 - Tech Stack: MERN Stack, MongoDB, PDF Libraries
- Deepfake Detector**
- Developed a deepfake detection system using deep learning techniques for identifying manipulated media content.
 - Focused on feature extraction and classification for fake media detection.
 - Tech Stack: Python, Deep Learning, Computer Vision
- Crime Detector**
- Built a machine learning-based crime detection system using classification and data analysis techniques.
 - Applied ML algorithms for identifying crime-related patterns and predictive insights.
 - Tech Stack: Python, Machine Learning, Data Analysis

Experience

- Labmentix – Remote Intern** June 2025 – July 2025
AI/ML and NLP Intern Remote
- Worked on AI/ML and NLP-based projects in a research-oriented environment.
 - Contributed to machine learning workflows and intelligent systems development.
 - Collaborated on technical implementation and project research activities.
- Freelance Graphic Designer**
Graphic Designing Projects
- Worked on digital creatives, posters, and visual content design projects for clients.
 - Developed user-focused and visually appealing design assets.

Leadership & Extracurricular Activities

Pratigya Society

Member

- Participated in society activities, collaborative events, and organizational initiatives.

FAPS (Fine Arts and Photography Society)

Member

- Contributed to creative and artistic activities through event participation and design involvement.

Achievements & Certifications

- Completed Industrial Training in Artificial Intelligence with hands-on exposure to AI/ML workflows and intelligent systems development.
- Completed Deloitte Australia – Technology Job Simulation through Forage.
- Participated in hackathons and AI/ML-based project development involving NLP, semantic search, deepfake detection, and intelligent retrieval systems.
- Active learner in AI, Machine Learning, and Software Development with strong problem-solving and research-oriented interests.
